2. Citations and explanations (Rule 70.7)

Reference is made to the following documents:

D1 : KR 10-2001-0067896 A (FINGER SYSTEM Co) 13. July 2001.

The present invention relates to a pen-shape optical mouse comprising a transparent optical tip member mounted to one end of the mouse body, an optics part, and a contact button sensor adapted to perform a scroll function. The contact button sensor includes a transparent button mounted to a side wall of the mouse body.

Document D1 discloses a pen-shape optical mouse comprising an optics part and a input function part with a control button, a wheel switch, and pressure sensor. However, D1 does not discloses a contact button sensor adapted to perform a scroll function. The pen-shape optical mouse defined in claims 1-11 are thus considered new relative to the prior art of D1.

Since claims 1-11 are new (Article 33(1) and (2) PCT) and involve an inventive step (Article 33(1) and (3) PCT).

All claims are considered to be industrially applicable (Article 33(4) PCT).
